# Sales & Profit Analysis Dashboard (Power BI)

# Business Problem

Businesses often use discounts to drive sales, but excessive discounting can reduce profitability.
The goal of this analysis was to understand how discounts impact profit, identify high-performing regions and categories, and uncover trends over time to support better pricing and sales strategies.

# Dataset

The dataset contains transactional sales data from 2014 to 2017, including:

- Sales revenue
- Profit
- Discount levels
- Product categories
- Regional performance

# Tools Used

**SQL**

Data cleaning and transformation

PowerBi

Data visualization and dashboard creation

Excel

Data inspection and validation

# Data Cleaning & Preparation

Converted discount values into numeric percentages

Removed inconsistencies and null values

Created calculated columns for profit and discount impact

Structured data for time-series analysis

# Sales & Profit Dashboard

- This interactive dashboard was designed to analyze sales performance and evaluate the impact of discount strategies on profitability.
- It enables stakeholders to identify key trends, high-performing regions, and areas where excessive discounting negatively affects profit.

# Key Insights

These insights suggest that aggressive discounting strategies may harm overall business performance.

Revenue increased steadily from 2014 to 2017, showing consistent business growth

Profit peaked in 2016 and continued to grow at a slower rate

The West region generated the highest revenue and profit

The Technology category outperformed other product categories

Higher discount levels significantly reduced profitability, with some discounts leading to negative profit

# Recommendations

Limit high discount levels to protect profit margins

Focus on high-performing regions such as the West

Invest more in the Technology category due to its strong returns

Use data-driven pricing strategies instead of blanket discounts

# What I Learned

- How to identify profit drivers using data
- How pricing strategies impact business performance
- How to design dashboards for decision-making

# Thank You
